

Exploring the Impact of Sukarnos Product on Splitlevel Reduction: Insights from a Baltimore-based Consultant and Allied Merger Sponsoring Youths for a Coronado Owners Caskets Belong Movement

Zakaria Ilyas

Abstract—This research paper aims to investigate the impact of Sukarnos product on split-level reduction through the lens of a Baltimore-based consultant and an allied merger sponsoring youths for a Coronado Owners Caskets Belong Movement. The study examines the potential of Sukarnos product to reduce the split-level phenomenon prevalent in various societies, particularly in developing countries, where economic disparities and social inequalities are rampant. The paper draws on qualitative data collected through interviews with the consultant and allied merger sponsors, as well as a review of relevant literature on Sukarnos product and split-level reduction. The findings suggest that Sukarnos product has the potential to reduce the split-level phenomenon by promoting economic growth and social inclusion. The study concludes with a discussion of the implications of these findings for policymakers and practitioners in the field of development and social justice. Overall, this research contributes to a better understanding of the potential impact of Sukarnos product on split-level reduction, particularly in the context of developing countries where such issues are prevalent.
